Observations and Corrective Actions

Violations cited in this report must be corrected within the time frames below, or as stated in sections 8-405.11 of the food code.

- 7-204.11 Sanitizers, Criteria-Chemicals P Sanitizer (quat) in three compartment sink of meat market and in sanitizer buckets in the deli were of too high a concentration at higher than 400 ppm. Quat sanitizer must be kept at a level prescribed by the manufacturer (150 400 ppm). Upon emptying and refilling sanitizer it was established that the three compartment sinks sanitizer is dispensed after water is filled in the basin and the sanitizer floats on top causing too high a concentration in the top layer of the water. The sanitizer bucket being filled from this unmixed sanitizer solution results in too high a concentration in the buckets. The employees must manually mix sanitizer after dispensing to create an approved sanitizer solution (measured at 200 ppm after mixing) and must only fill sanitizer buckets after mixing the sanitizer in the basin. CDI: Employee remixed sanitizer and emptied and refilled sanitizer buckets during inspection. 0 pts
- 45 4-501.11 Good Repair and Proper Adjustment-Equipment C Light rust present on three compartment sink sprayer arm spring. Light rust present on castors through meat market and deli. Have rusted items thoroughly cleaned to remove as much surface rust as possible. If problem is not alleviated then replace the rusted components. Equipment must be kept in good repair. 0 pts
- 47 4-601.11 (B) and (C) Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils C Cleaning needed on sides and under sides of prep tables in deli to remove stuck on debris. / Cloth under turkeys in display coolers need to be removed and replaced as they have become soiled. / Metal shelves in walk in cooler need to be cleaned as they have stuck on debris and cardboard. / Non food contact surfaces shall be kept clean.

Observations and Corrective Actions	 ✓
Violations cited in this report must be corrected within the time frames below, or as stated in sections 8-405.11 of the food code.	Spell

53 6-201.11 Floors, Walls and Ceilings-Cleanability - C Gaps present in metal panels in meat market. Seal gaps in metal panels. / Gaps present where metal walls meet concrete floors in walk in cooler. Seal these gaps. / Rust present on metal cable boxing in deli, recondition to remove rust. / Metal wall support rusted in walk in cooler, Recondition to repair rust damage. / Physical facilities shall be kept in good repair. //

6-501.12 Cleaning, Frequency and Restrictions - C Detail cleaning needed under shelving in walk in cooler to remove debris. // 6-101.11 Surface Characteristics-Indoor Areas - C Seafood stand in aisle near meat market is an unapproved non permitted area. Seafood sale, prep, and handling must be conducted in a permitted area. If Seafood sales are to continue the establishment must obtain proper permits for operation of food sales and appropriate permits regarding construction and plumbing.
